SUMMARY

IT Undergraduate Detail-oriented IT undergraduate proficient in MERN stack, Java, and Kotlin with handson experience in full stack web and mobile development. Seeking an internship to deliver user-centric, highquality code in Web, Mobile, or QA Engineering roles..

PROJECT

SmartBook-AI - https://github.com/chathu-02/SmartBook-AI

- **Link to Live Demo - https://smartbook-ai.onrender.com/**
- Project Overview: Developed a modern, AI-integrated appointment management system that allows users to book services using natural language instead of traditional forms.
- **Technologies Used:** Next.js 14, TypeScript, Tailwind CSS, Supabase (PostgreSQL & Auth), Git, and Render for deployment.
- Integrated an **AI-driven booking engine** that processes user text to extract appointment details automatically.
- Built a **Secure Admin Dashboard** with authentication to manage, search, and delete real-time appointment data.
- Implemented **Responsive UI/UX** using Tailwind CSS, ensuring a seamless experience across mobile and desktop devices

AURAGEM CUSTOM - https://github.com/chathu-02/e-commerce-website

- Link to live demo - https://aura-gem-store-final.onrender.com/
- Developed a full-stack e-commerce platform specifically for a jewellery business using React.js, Node.js, Express.js, and MongoDB.
- Designed a user-friendly and elegant interface using Figma and implemented it with Tailwind CSS for a premium look and feel.
- Building an Admin Dashboard to manage product listings (CRUD operations), track orders, and view customer insights.
- Implemented secure user authentication and a responsive shopping cart experience.
- Utilized Git for version control and maintained a clean, organized codebase on GitHub. Online salon management system

SALON LAARO - **https://github.com/chathu-02/Salon-Management-System**

- Designed and developed a full-stack web application using **MERN** stack (React.js, Node.js, Express.js, and MongoDB) to automate salon bookings and service management.
- Implemented secure user authentication and a real-time booking dashboard using React.js and Node.js.

Personal Task Manager - https://github.com/chathu-02/Personal-WellnessApp

- Developed a native Android application using Kotlin to streamline daily task management.

TUNKART - Online Music Store - **https://github.com/chathu-02/Online-Music-Store**

- Built a scalable music platform using Java and MySQL, adhering strictly to the MVC architecture

Recruitment-of-Company-System Recruitment Company - https://github.com/chathu-02/Recruitment-System

- Built a dynamic website to connect job seekers with employers • HTML, CSS, JS, PHP, and MySQL

EDUCATION

BSc (Hons) in Information Technology specializing in Information Technology Undergraduate at SLIIT - (2023 Nov – Present)

English & IT diploma in ICBT kandy campus (2022)

SKILLS

- **Backend Development –** JAVA, PHP, Node.js, JavaScript, Express.js, C++
- **Frontend Development –** React.js, JavaScript, Html5/CSS, Tailwind CSS, Nect.js
- **Technologies –** MERN Stack, MVC
- **Mobile App Development –** Kotlin, JAVA, Android Studio
- **QA Testing –** Postman, SDLC, Test Case writing, Performance testing
- **Version Control & Tools –** Git & Github, Jira
- DataBase – MongoDB , My sql, supbase
- **Soft Skills –** Leadership, Team Work, Project Management, Critical Thinking, Communication, Problem Solving, Adaptability, Quick Learning, Experimenting
